01 Brand Overview

Our Mission

LexReg Africa empowers Kenyan businesses to achieve governance excellence, regulatory compliance, and organisational readiness through intelligent, accessible, and affordable digital tools.

Positioning Statement

For Kenyan business owners who need compliance confidence, LexReg Africa is the governance OS that makes legal readiness simple, affordable, and entirely their own.

Brand Pillars

Trust

Every tool, interaction, and document we produce builds the user's confidence in their compliance journey.

Clarity

Complex legal and regulatory requirements are translated into clear, actionable steps any business owner can follow.

Empowerment

We hand control back to the business. LexReg Africa is an OS they own, not a service they depend on.

Brand Personality

- Authoritative** We know the law, the process, and the path forward.
- Accessible** Compliance should not require a law degree.
- Precise** Every detail matters in governance. So does ours.
- Modern** Built for the Africa of today, not yesterday's bureaucracy.

02 Logo System

Primary Logo — Light Background

Light background usage

Dark background usage

Logo Mark — Icon Only

40px min

Preferred

Large

Clear Space

Always maintain a minimum clear space of 1x around the logo mark (x = logo mark height). This space must be free of other graphics, text, or imagery.

≥ 1x clear space

Incorrect Usage

- Do not rotate or skew the logo
- Do not alter the gold or navy colours
- Do not use the wordmark without the mark

- Do not place on low-contrast backgrounds
- Do not add effects (shadows, outlines, glows)
- Do not stretch or distort proportions

03 Colour Palette

Primary Colours

HEX #1A1A2E
RGB 26, 26, 46
CMYK 43, 43, 0, 82
PANTONE Pantone 275 C

HEX #C9A227

Colour Usage Rules

- Navy is always the primary surface for headers, sidebars, and primary actions.
- Gold is used for accents, active states, highlights, and CTAs — never as a background for large areas.
- Never place gold text on a white background (insufficient contrast). Always pair with navy or dark surfaces.
- Neutral greys form the content canvas. Reserve colour for hierarchy and meaning, not decoration.

04 Typography

Type Family — Geist Sans

Geist Sans (by Vercel) is the primary typeface across all digital surfaces. For print and PDF documents, Inter — a visual equivalent with near-identical metrics — is used.

Type Scale

Display 40px / 2.5rem · Page titles, hero text

Heading 1 32px / 2rem · Section titles

Heading 2 24px / 1.5rem · Card headings

Heading 3 18px / 1.125rem · Sub-sections

Body 14px / 0.875rem · Primary reading text

Small 12px / 0.75rem · Captions, metadata

Available Weights

Ag

Light (300)

Supporting text, subheadings on dark

Ag

Regular (400)

Body text, descriptions

Ag

SemiBold (600)

Labels, navigation, button text

Ag

Bold (700)

Headlines, emphasis, CTAs

Monospace — Geist Mono

```
REG-2025-0421-KE
entity.registration_number · audit_log.entry_id
Geist Mono / Courier
```

Usage Rules

- Hierarchy through weight** Use weight — not size — to establish hierarchy within the same size. Bold for titles, Regular for body.
- Tracking on labels** Uppercase labels and captions use letter-spacing of 0.08em–0.12em for readability at small sizes.
- Monospace for data** All registration numbers, entity IDs, audit log entries, and code snippets use Geist Mono.
- Minimum body size** Never set body text below 12px / 9pt. For print materials, body minimum is 10pt.

05 Spacing & Grid

Base Unit — 4px Grid

All spacing decisions derive from a 4px base unit. Every margin, padding, gap, and component dimension is a multiple of 4. This creates visual rhythm and predictable density across every screen.

Spacing Scale

1 / 4px		Icon gaps, tight
2 / 8px		Icon + label, tight
3 / 12px		Input padding v
4 / 16px		Card padding, f
5 / 20px		Section internal
6 / 24px		Card header gap
8 / 32px		Between compo
10 / 40px		Section padding
12 / 48px		Major section g
16 / 64px		Page section pa

Border Radius

					
sm 6px	md 8px	lg 10px	xl 14px	2xl 18px	full 9999px

Page Layout Grid

The dashboard uses a fixed sidebar + fluid content area:

Sidebar	240px fixed
Content area	Fluid, max-width 1280px
Content padding	24px (6 × 4px)
Card gap	16px (4 × 4px)
Mobile breakpoint	< 768px — sidebar collapses

Toast Notifications

Entity created successfully.

OCR confidence below threshold — manual review required.

07 Brand Voice

Tone of Voice

LexReg Africa speaks with authority and warmth. We are the knowledgeable friend who happens to be a lawyer — clear, direct, never condescending. We translate legalese into plain action.

Voice Dial

Writing — Do's and Don'ts

Write this	Not this
Your entity is now active and ready for compliance review.	Congratulations! Your entity has been successfully activated in the system!
Upload your certificate of incorporation to continue.	Please upload the required certificate of incorporation document to proceed with the workflow.
OCR confidence is low. Please review highlighted fields.	The optical character recognition system could not achieve sufficient confidence threshold.
Ready to file? We'll generate your information pack.	Would you like us to prepare the necessary documentation for submission?

Key Terminology

Entity	A registered business in LexReg (company, partnership, etc.)
Onboarding path	The user's chosen route: Existing Entity / New Entity / Informal
Legal Audit	The KES 25,000 comprehensive compliance review service
OCR Extraction	Automatic data extraction from uploaded documents
Readiness Score	The 0-100 formalisation score for informal businesses
BRS	Business Registration Service — Kenya's company registrar
Super Admin	Charles (legal partner) — platform-wide access and oversight

08 Do's & Don'ts

Logo

- + Use the logo on navy or white backgrounds only
- + Maintain the defined clear space at all times
- + Use the provided logo files — never recreate
- Rotate, skew, or distort the logo
- Recolour the logo mark or wordmark
- Place the logo on busy photographic backgrounds

Typography

- + Use Geist Sans for all UI text
- + Establish hierarchy through weight, not size alone
- + Use Geist Mono for all registration numbers
- Use more than two type sizes in a single component
- Set body text below 12px / 9pt
- Use decorative or system-default fonts

Colour

- + Use navy for primary surfaces and actions
- + Use gold sparingly as an accent and highlight
- + Check contrast ratios before finalising
- Use gold as a large background colour
- Mix brand palette with unrelated colours
- Use gold text on a white background

Voice

- + Write in plain, direct language
- + Use active voice ('Upload your document')
- + Reference Kenyan regulatory bodies correctly
- Use jargon without explanation
- Write in passive voice unnecessarily
- Overpromise ('We guarantee registration')
